

**Poisoning Our Air Now.
Chemical Tanks and 1000s of Canisters Found.
Dangerous Chemical Vapors are being released into OUR
AIR.**

Independent Testing done during Bilwin Developments' activities on the Marbledale Road Quarry Dump **confirm that dangerous chemical vapors are being released into our air.**

The Construction and Remediation Activities on the Marbledale Road Quarry Dump are releasing toxic chemical vapors into our air.

- You have a right to a clean environment.
- Tell them that they can not continue to poison our air.
- Tell them to show us where the highly contaminated ground water is going.
- You must act.
- This is your air.

The Marriott Springhill Suites Hotel
is being built on the
Marbledale Road Hazardous Waste Dump.

- 1.** We are not protected from the chemical vapor release.
- 2.** The Air Monitoring being used by the developer is incapable of detecting the most toxic chemical vapors.
- 3.** The Air Monitoring being used by the developer is incapable of warning anyone about the most hazardous chemical vapors.
- 4.** The Air Monitoring that they are using is incapable of detecting the most toxic chemical vapors at hazardous levels.
- 5.** They are not protecting our communities:
 - i) They are not detecting the hazardous chemical vapors.
 - ii) They are not treating the hazardous chemical vapors.
 - iii) They are not tenting the hazardous waste dump.
 - iv) They are not tracking the toxic contaminants in the ground

water.

v) They are not tracking the toxic vapor release from the contaminated ground water.

6. Do not allow them to continue to placate you by telling you that this project and these activities are safe:
make them PROVE that it is safe.

The Village of Tuckahoe has the authority to protect Our Air from Toxic Vapor Release & our Water from Contamination.

1. The Village of Tuckahoe has the authority to require Full Health Assessments of all of the Dump Activities.
2. The Village of Tuckahoe has the authority to require the Most Protective Air Monitoring systems.
3. The Village of Tuckahoe has the authority to require all State of the Art Community Protections against Hazardous Toxic Contaminant Release.

The Village of Tuckahoe Boards Allowed the Hazardous Contaminant Release: Tell them to Stop it!

The Village of Tuckahoe, and the Village of Tuckahoe Boards, have permitted Bilwin Development's intrusive dump activities.

Demand that the Village of Tuckahoe stops Poisoning Our Air.

Demand that ALL of your government officials take actions now to protect us from further toxic contaminant release.

The Air does not know boundaries.

**The Groundwater Flows under our homes, under our
playgrounds, into our River, releasing vapors all the way.**

They are digging and releasing poisons.

Do not let them play shell games with your life.

Just because you can not see the chemical vapors, or the contaminated groundwater, that does not mean that the toxics are not dangerous.

Your hat can not detect the toxic vapors either.

Ask your hat how your air is impacted by the chemical vapor release.

What about the contaminated ground water?

Your hat didn't respond? Does not mean that we are not impacted?

None Detection of the toxics is Dangerous.

Demand that they tell us the impacts on our air and water!

This is a Hazardous Waste Dump!

Found:

Buried Chemical Tanks and 1000es of Canisters in the Marbledale Road Toxic Quarry Dump.

Witnesses to the dumping, and independent experts, all testified that the **Marbledale Road Quarry Dump** contains great amounts of **Hazardous Waste**.

Buried Chemical tanks and canisters have been found less than 15' below the surface.

The Chemical tanks and canisters found are significant proof of hazardous waste in the dump.

The Marbledale Road Hazardous Waste Quarry Dump is more than 80 feet

deep, full of hazardous waste.

What is going to happen when they drill 180+ pylons into 80+ feet of hazardous waste?

The Poisoning of Our Air!

Our Independent experts agree that when then hazardous waste, toxic chemical vapors, and pools of contaminants, are agitated by the drilling and construction actions, there will be toxic release.

These construction activities on the Marbledale Road Hazardous Waste Dump are dangerous and will impact our Communities.

TAKE ACTION:

Tell all of the Public Officials, Repeatedly:

This is unacceptable, and we need to be protected.

**Odors in the Air, are they contaminated vapors?
Report it!**

Community members have reported sulfur and sweet chemical odors in the air.

If you smell something, **please report it immediately** to:

The local Fire Department: 911 &

The Westchester County Health Department: (914) 813-5000,
&, your local officials.

It is important to report everything for all of our protection!

The Environmental Experts who are
Protecting & Advocating for us,
and an injunction to protect our Air.

The Injunction and the Article 78 are in front of the Judge.

Please help us fund these costly actions.
We need our community's support.
We are trying prevent further toxic release into our
communities.
This all costs money, please assist.
PLEASE CONTRIBUTE.

Our Independent Environmental consultants are evaluating all of the data that is released, and are working for all of us.

The Article 78 seeks to overturn the dangerous, and premature decisions that have lead us to this hazardous situation.

Please help us fund the Environmental Experts, Their support is crucial to our efforts.

When you can't breath, nothing else matters.
